Set Up Instructions

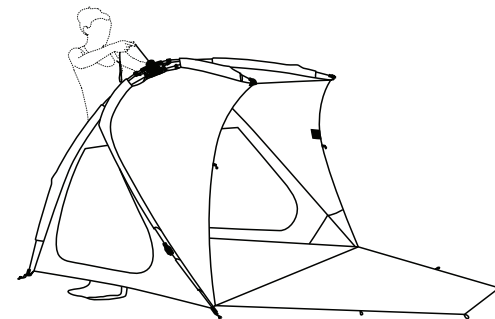

Remove any rocks, branches and other sharp objects from the area you will lay on. Spread the shade evenly on the ground.

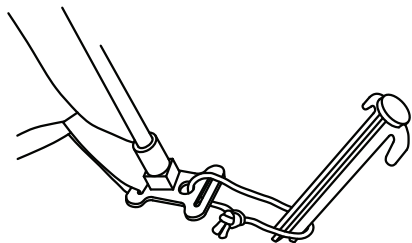

With the hub in an upright position, unfold the poles and lock the joints.

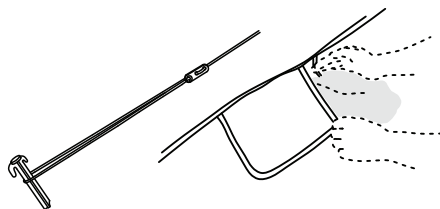

Standing behind the shade, grab the top orange drawstrings, one in each hand.

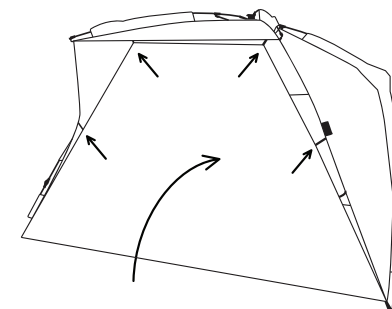

Pull the drawstrings firmly until the upper and lower parts of the hub connect, and the shade takes its final shape.

Fasten the shade to the ground by inserting the included pegs through the appropriate loop found at the end of each pole.

For extra stability, fasten the shade to the ground using the outer cords and fill with sand or pebbles the peripheral outer pockets.

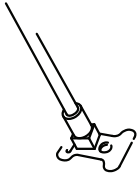

For extra privacy or when away from the shade, fold the ground sheet and hang it on the appropriate hooks found on the shade's flysheet.

Collapse Instructions

Remove all the pegs and empty the peripheral pockets.

Standing behind the shade, grab the left and right poles and place your thumb on the underlying hinges.

Using your thumbs, push the orange poles downwards to disengage the hub and collapse the shade.

Unlock the joints and fold the poles onto themselves.
